# Tushtee Kothare

Indore, Madhya Pradesh 452001, India | tushteekothare@gmail.com | 7974165722 | LinkedIn | GitHub

Full-stack developer experienced in building scalable applications with JavaScript, React, and Node.js. Constructed AI-powered platforms end-to-end — including an AI-driven career guidance app and a candidate ranking system — with REST APIs, MongoDB/PostgreSQL data models, and authentication. Strong foundation in data structures & algorithms and system design, with a focus on clean, scalable, and testable code.

## TECHNICAL SKILLS

**Languages:** C++, JavaScript, Python
**Frameworks & Libraries:** React, Next.js, Node.js, Express (MERN stack)
**Databases:** PostgreSQL, MongoDB, SQL
**APIs & Backend:** RESTful APIs, JWT Authentication, Event-driven data pipelines
**AI/ML:** LLM-integrated application design, AI-based recommendation & ranking systems
**Core CS:** Data Structures & Algorithms, System Design, Testable & Clean Code
**Tools & Platforms:** Git, GitHub, Postman, Vercel

## PROJECTS

**AI Candidate Ranker** | *MERN Stack (React, Express, MongoDB), Python*

- Built an AI candidate-ranking feature on top of a full-stack MERN recruiter platform (React, Express, MongoDB, JWT auth), adding an offline, CPU-only ranking pipeline in Python
- Processed 100,000+ candidate records in under 5 minutes with an offline Python pipeline and no external cloud AI services, scoring five signals: career evidence, skills, seniority, location, and availability
- Incorporated detection logic to flag and penalize keyword-stuffing and low-signal “honeypot” profiles, and generated schema-validated, reproducible CSV outputs with setup/evaluation documentation

**EduGuide — AI-Powered Career Guidance Platform** | *Next.js, TypeScript, MongoDB*

- Architected a full-stack web application using Next.js, TypeScript, and MongoDB, exposing REST APIs for aptitude-based career recommendations
- Designed an aptitude-based recommendation engine to generate personalized career paths from user input data
- Implemented dynamic college search and filtering, plus interactive dashboards and career-visualization charts

**CampusMarketplace Platform — Full-Stack Developer** | *Next.js, Node.js, MongoDB*

- Developed a full-stack marketplace enabling students to buy and sell items on campus, with secure JWT-based authentication
- Built REST APIs for managing products, users, and transactions
- Created product listings, search & filtering, and user dashboards with a responsive, performance-optimized UI

## EDUCATION

**AITR, Indore** — B.Tech in Computer Science & Engineering | Aug 2023 – Jul 2027

## CERTIFICATIONS

GeeksforGeeks — Full Stack Development

IBM – Full Stack Developer

## ACHIEVEMENTS

- Solved 100+ DSA problems on LeetCode

## ADDITIONAL

**Soft Skills:** Collaboration, Problem-solving, Communication, Time Management
**Languages:** English, Hindi
